

Create your own masterpiece

Create stunning natural, coloured, marble, stone or patterned effects for your interior walls.

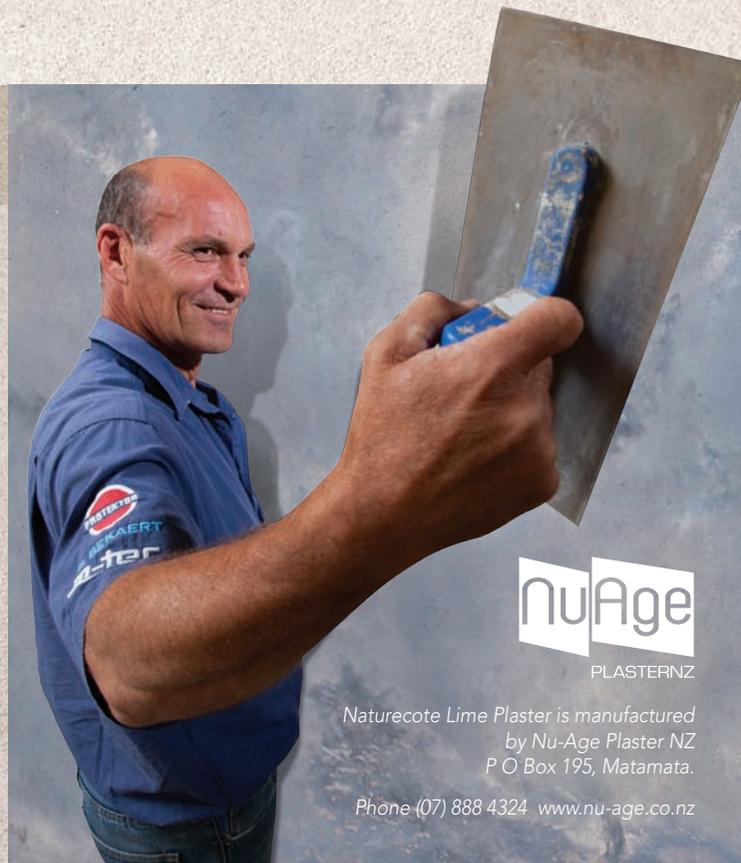

Naturecote Lime Plaster finishes are all hand applied by trowel and can be brought up to a high polish – smooth to the touch.

You can create your own masterpiece with natural colour pigments or make a bold statement in any colour to compliment your décor. Two or three colours can be combined to create special effects. You can Naturecote your interior walls in any colour from the Watty, Dulux or Resene paint ranges.

Choose a healthier living environment

Naturecote Lime Plaster is manufactured in New Zealand from sand and lime using the latest computerised technology to provide consistent high quality lime plaster every time.

Non-toxic and stable, Naturecote Lime Plaster contributes to a clean, healthy indoor air quality. Naturecote Lime Plaster helps to control the relative humidity and high PH levels in a room - naturally preventing mildew, fungus and mould growth.

Natural. Earthy

A superior finish for most surfaces

Naturecote Lime Plaster can easily be applied to most interior surfaces. Old brickwork can be rendered but still retain that old world charm and feel. Clay bricks, gib board, plaster board, concrete block and auto-claved aired concrete can all be plastered without losing breathability.

Technical specification sheets, detailed application instructions and advice are freely available at www.naturecote.co.nz.

Enjoy the natural benefits of Naturecote Lime Plaster

- Less moisture
- Easy to maintain and keep clean
- Non toxic
- Reduced condensation
- Reduced mould, fungus and mildew
- Strong and durable

Pattern. Stylish

Strong, durable and easy to maintain

Little maintenance is required with Naturecote Lime Plaster. It's easy to brush or wipe clean.

Show off your artwork, mirrors and paintings on Naturecote Lime Plaster walls by using plastic adhesive hangers. For heavier artwork long screws can be slowly drilled into the plaster and onto the stud.
